

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

INDEX TO VOLUME IX

(New names and final members of new combinations are in **heavy-face** type.)

- Actinomyces and hydrogen-ion concentration, 160
Agaricus, development of: *arvensis*, 512; *campestris*, 509; *comtulus*, 512; *melleus*, 510; *Rodmani*, 512; *tabularis*, temperatures for growth of, 388
Age and maturity of host tissue in relation to virulence of disease, 196
Agropyron, susceptibility of, to disease, 196
Agrostis alba, susceptibility of, to disease, 197
Algal cells, methods of healing in some, 18
Alsine media, viability of seeds in, 268
Alternaria brassicae, 459
Althea rosea, *Puccinia malvacearum* on, 195
Aluminum and iron salts, the growth of field corn as affected by, 47
Amanitopsis vaginata, development of the carpophore of, 511
Amaranthus graecizans, viability of seeds in, 268; *retroflexus*, viability of seeds in, 268
Ambrosia elatior, viability of seeds in, 268
Anthemis cotula, viability of seeds in, 268
Apples, freezing of, in storage, 555
Arenga saccharifera, 82
Arisaema triphyllum and *Arisaema Dracontium*, control of the sexual state in, 72
Armillaria (mellea), 510
ARNDT, CHARLES HOMER. The growth of field corn as affected by iron and aluminum salts, 47
Ascochyta pisi, 464
Ash, *Fomes fraxinophilus* on, 506; *Polyporus hispidus* on, 506
Asparagus rust, 194
Aspergillus niger, 459; and hydrogen-ion concentration, 159
Avena sativa, 199

BAILEY, IRVING W. The pollination of *Marcgravia*: a classical case of ornithophily?, 370
Barley, top and root growth of, 423
BARTLETT, H. H. (See Carl D. La Rue, 79, and Peter J. Klaphaak, 446)
Beal's, Dr. W. J., seed-viability experiment, 266
BENEDICT, R. C. The origin of new varieties of *Nephrolepis* by orthogenetic saltation II. Regressive variation or reversion from the primary and secondary sports of *bostoniensis*, 140
BENNETT, C. W. (See H. C. Young, 459)
Berberis vulgaris, 199
BERGMAN, H. F. Observations on the effect of water-raking on the keeping quality of cranberries, 245
Betel-nut palm, leaf spot of, 85
Bignoniaceae, stigmas of, 120
Biophysics as a point of view in plant physiology, 37
Birch twigs, temperatures of, 389
Blackberry canes, temperatures of, 387
BONNS, WALTER W. A preliminary study of *Claviceps purpurea* in culture, 339
Bordeaux mixture, the effect of, upon the chlorophyll content of the primordial leaves of the common bean, *Phaseolus vulgaris* L., 535
Bornetia secundiflora, healing in, 18
Botryosphaeria ribis, 386
Botrytis allii, 464; *cinerina* and hydrogen-ion concentration, 161; *cinerina* on strawberries, 204
Brassica nigra, viability of seeds in, 268
Bremia lactucae on lettuce, 233
Bromus secalinus, 187; viability of seeds in, 268
Bursa bursa-pastoris, viability of seeds in, 268

Caeoma abietis-canadensis, origin of pycnia of, 363
Calvatia cyathiformis, temperatures for growth of, 388
Cannabis sativa, sex in, 78
Caracasia, nectaries of, 371
Carbohydrates, effect of, on root growth, 442
Carbon metabolism of the host, 189
Carnation rust, 194

- Catalpa bignonioides*, stigma of, 100
 Cell-plate formation, review of literature of, 296
Cercospora apii, 464; *beticola*, 464
Cestrum nocturnum, 263
Chaetochloa lutescens, viability of seeds in, 268
Chaetomorpha melagonium f. *typica*, healing in, 12
Chara, healing in, 19
Chenopodium album, viability of seeds in, 268
 Chlorophyll content of the primordial leaves of the common bean, *Phaseolus vulgaris* L., the effect of Bordeaux mixture upon, 535
Chomiocarpon, 288
 Citrus leaves, vein-islets of, 121
Cladophora, healing in, 19
Claviceps Paspali, 340; *purpurea* in culture, a preliminary study of, 339
 CLELAND, RALPH E. The reduction divisions in the pollen mother cells of *Oenothera franciscana*, 391
 Coconut pinnae, incipient drying and wilting as indicated by movements of, 253
Cocos nucifera, leaves used in physiological experiments, 254; Pestalozzia on, 81
 Cold storage of fruits and vegetables, 551
Colletotrichum lagenaria, 464; *lindemuthianum*, 459
Conocephalum, 293
Coprinus, certain species of, and *Agaricus campestris*, the origin and development of lamellae in, 509
Coprinus, development of; *atramentarius*, 512; *comatus*, 512; *ephemerus* 513; *micaceus*, 510; *stercorarius*, 513
 Corn, the growth of field, as affected by iron and aluminum salts, 47; roots of, with plumule and endosperm removed but with cotyledon attached, effect of increased nitrates upon growth of, 439
Cortinarius pholideus, development of, 512
 Cranberries, observations on the effect of water-raking on the keeping quality of, 245
Cronartium ribicola, infection of *Ribes* by, 197
 Culture media, synthetic, growth of some parasitic fungi in, 459
 Cultures, plant, the physiological balance in nutrient solutions for, 180
 Currant twigs, temperatures of, 386
Cuscuta, revision of the South American species of, 557
Cuscuta acutiloba, 567; *americana*, 573, v. *congesta*, 573, v. *spectabilis*, 573; *argentiniana*, 561; *boliviiana*, 565; *braceata*, 569; *brevisquamata*, 560; *chilensis*, 562; *corniculata*, 570; *corymbosa*, 573, v. *grandiflora*, 573, v. *microlepis*, 573; *epithymum*, 559; *foetida*, 565, v. *pycnantha*, 566; v. *typica*, 566; *globiflora*, 564; *goyaziana*, 568; *grandiflora*, 560; *incurvata*, 571; *microstyla*, 561; *odorata*, 563, v. *botryoides*, 564, v. *Holwayana*, 564, v. *typica*, 564; *orbiculata*, 572; *partita*, 574; *prismatica*, 574; *serrata*, 569; *trichostyla*, 571, v. *carinata*, 572; *typica*, 572; *umbellata*, 575; *xanthochortus*, 567, v. *lanceola'a*, 568, v. *typica*, 567
 Cytokinesis of *Nelumbo*, the meiotic, 296
Dactylis glomerata, susceptibility of, to disease, 196
 DARLINGTON, H. T. Dr. W. J. Beal's seed-viability experiment, 266
Dianthus sinensis, *Puccinia Caryophylli* on, 193
Digitalis purpurea, stigma of, 102
Diplacus glutinosus, stigmas of, 99
 Disease resistance and susceptibility, 183; 215
 DODGE, B. O. Studies in the genus *Gymnosporangium* IV. Distribution of the mycelium and the subcuticular origin of the telium in *G. clavipes*, 354
Dothidella quercus, 464
 Drying and wilting, incipient, as indicated by movements of coconut pinnae, 253
Dumortiera irrigua, 288; *trichocephala*, 288; *velutina*, 288
 DUPLER, A. W. The male receptacle and antheridium of *Reboulia hemisphaerica*, 285
 Ecological relations of plants in south-eastern Missouri, 1
Elymus, susceptibility of, to disease, 196
Endothia parasitica and hydrogen-ion concentration, 160
 Environmental temperatures of fungi in nature, 385
Epilobium hirsutum, root cells of, 123
Erechites hieracifolia, viability of seeds in, 268

- Ergot, the chemistry and toxicology of, 348
Erysiphe graminis, 447; on barley, 426;
Polygoni on *Oenothera*, 449
Euonymus japonicus, infected by powdery
 mildew, 450
Euphorbia maculata, viability of seeds in,
 268
- FARR, CLIFFORD H. The meiotic cytoki-
 nesis of *Nelumbo*, 296
- Fimbriaria, 291
- Flax, top and root growth in, 432
- Fomes fraxinophilus* on ash, 506; *igniarius*
 on poplar, 506
- Forests of southeastern Missouri, 3
- Fouquieria splendens*, water content of the
 leaves of, 262
- Fragaria* sp., temperatures of, 387
- Freezing, the effect of low-temperature
 storage and, on fruits and vegetables, 551
- Fungi, environmental temperatures of, in
 nature, 385
- Fusarium* and hydrogen-ion concentration,
 161; *batatas*, 464; *conglutinans*, 464;
oxysporum, 462; *radicicola*, 464
- GERICKE, W. F. On the physiological
 balance in nutrient solutions for plant
 cultures, 180; certain relations between
 root development and tillering in wheat:
 significance in the production of high-
 protein wheat, 366
- Gibberella Saubinetii* on wheat, 159
- Glomerella Gossypii* and hydrogen-ion con-
 centration, 159
- Growth of field corn as affected by iron
 and aluminum salts, the, 47
- Gymnosporangium, studies in the genus,
 IV. Distribution of the mycelium and the
 subcuticular origin of the telium in
G. clavipes, 354; on *Juniperus virginiana*,
 354; *juniperi-virginiana* infections on
 apple, 197
- HANSON, HERBERT C. Prairie inclusions in
 the deciduous forest climax, 330
- HAWKINS, LON A. The effect of low-
 temperature storage and freezing on
 fruits and vegetables, 551
- Healing in some algal cells, methods of,
 18
- Hendersonia theaecola* on tea, 81
- Hevea brasiliensis*, Pestalozzia on, 79
- HOPKINS, E. F. Hydrogen-ion concen-
 tration in its relation to wheat scab, 159
- Hordeum vulgare*, absorption of salts by,
 316
- HUNTER, MABEL R. The present status
 of *Scolopendrium* in New York State, 28
- Hydrogen-ion concentration in its relation
 to wheat scab, 159
- Impatiens aurea*, 200
- Iron and aluminum salts, the growth of
 field corn as affected by, 47
- IRWIN, MARIAN, and MARGARET WEIN-
 STEIN. Comparative studies on respi-
 ration XXI. Acid formation and de-
 creased production of CO₂ due to ethyl
 alcohol, 277
- JOHNSTON, EARL S. Undercooling of peach
 buds, 93
- Jungermanniales, 291
- KAUFFMAN, C. H., and H. M. KERBER.
 A study of the white heart-rot of locust
 caused by *Trametes robbiniophila*, 493
- KERBER, H. M. (See C. H. Kauffman, 493)
- KLAPHAAK, PETER J., and H. H. BARTLETT.
 A preliminary notice of genetical studies
 of resistance to mildew in *Oenothera*, 446
- LA RUE, CARL D., and H. H. BARTLETT.
 A demonstration of numerous distinct
 strains within the nominal species *Pest-
 alozzia Guepini* Desm., 79
- Lepidium virginicum*, viability of seeds in,
 268
- Lepiota, development of: *clypeolaria*, 512;
cristata, 512; *seminuda*, 512
- LEVINE, MICHAEL. The origin and devel-
 opment of lamellae in *Agaricus cam-
 pestris* and certain species of *Coprinus*,
 509
- Lignification of mature phloem in herb-
 aceous types, 239
- Locust, a study of the white heart-rot of,
 caused by *Trametes robbiniophila*, 493
- Lolium temulentum*, 234
- Lunularia, 293
- Lychnis githago*, viability of seeds in, 268
- Macrosporium brassicae*, 459; *commune* and
 hydrogen-ion concentration, 159; *sar-
 cinaeforme*, 464

- Magnolia, cell division in, 302
Malva rotundifolia, viability of seeds in, 268
 Marcgravia, the pollination of; a classical case of ornithophily?, 370
Marcgravia cuyuniensis, description of, 377; *purpurea*, description of, 378
 Marchantiales, 285
Martynia lutea, stigma of, 103; *proboscidea*, stigma of, 103
Martyniaceae, stigmas of, 120
 Meiotic cytokinesis of *Nelumbo*, the, 296
Mercurialis annua, sex in, 78
 MERRIMAN, MABEL L. A new species of *Spirogyra* with unusual arrangement of the chromatophores, 283
 Micrococcus, on *Oenothera: Lamarckiana*, 447
 Mildew in *Oenothera*, a preliminary notice of genetical studies of resistance to, 446
Mimulus cardinalis, stigma of, 103; *glabratus*, 108; *glabratus* var. *Jamesii*, 109; *guttatus*, 100; *luteus*, 103; *punctatus*, 117
 Mineral nutrients in host, 185
 Missouri, ecological relations of plants in southeastern, 1; forests of southeastern, 3
Monoselenium tenerum, 288
 MUENSCHER, WALTER C. The effect of transpiration on the absorption of salts by plants, 311

Nelumbo, the meiotic cytokinesis of, 296
 Nephrolepis, the origin of new varieties of, by orthogenetic saltation II. Regressive variation or reversion from the primary and secondary sports of *bostoniensis*, 140
 NEWCOMBE, F. C. Significance of the behavior of sensitive stigmas, 99
 NICHOLS, SUSAN P. Methods of healing in some algal cells, 18
 Nicotiana, cell division in, 303
 Nitella, healing in, 20
 Nitrogen nutrition in host, 185
Norantea anomala, 371; *brasiliensis*, 371
Notoholcus lanatus, 199
Nuphar luteum, cytokinesis in, 297
 Nutrient solutions for plant cultures, physiological balance in, 180; solutions for wheat, 270
Nymphaea alba, cell plate in, 298; cytokinesis in, 297
 Oenothera, a preliminary notice of genetical studies of resistance to mildew in, 446; *biennis*, 391, viability of seeds in, 268; *biennis Chicago*, 448; *cinerascens*, 449; *franciscana*, the reduction divisions in the pollen mother cells of, 391; *grandiflora*, 391; *Lamarckiana*, infection by *Micrococcus*, 447; *mississippiensis*, 448; *numismatica*, 448, immunity to mildew, 446; *nutans*, 447; *pratincola*, 448, infection by mildew, 446, hyb. *immunis*, 448, hyb. *viscida*, 448; *Reynoldsii*, 449, immunity to mildew, 446; *scitula*, immunity to mildew, 446; *stenorhynchus*, infection by mildew, 446
 Ornithophily?, the pollination of Marcgravia: a classical case of, 370
 Orthogenetic saltation, the origin of new varieties of Nephrolepis by, II. Regressive variation or reversion from the primary and secondary sports of *bostoniensis*, 140

 Peach, Elberta, 93; Greensboro, 94; buds, undercooling of, 93
 Pears, freezing of, in storage, 555
Pellia epiphylla, 291
Penicillium cyclopium and hydrogen-ion concentration, 161
Peridermium balsameum, origin of pycnia of, 363; *Hydrangeae*, origin of pycnia of, 363; *Peckii*, origin of pycnia of, 363
Peronospora Arthuri, 447
Pestalozzia Guepini Desm., a demonstration of numerous distinct strains within the nominal species, 79; *palmarum*, diseases caused by, 81; *Theaea*, on tea, 81
Phaseolus vulgaris L., the common bean, the effect of Bordeaux mixture upon the chlorophyll content of the primordial leaves of, 535
Phleum pratense, susceptibility of, to disease, 197
 Phloem, lignification of mature, in herbaceous types, 239
 Pholiota, development of; *adiposa*, *flammea*, *squamosa*, 512
Phoma apicola, 464
Pisum sativum, infection by *Erysiphe Polygonyi*, 450
 Plagiochasma, 292
 Plant physiology, biophysics as a point of view in, 37

- Plantago major*, viability of seeds in, 268
Plenodomus fuscomaculans, 461
Pluteus admirabilis, development of, 512
 Pollination of *Marcgravia*, the: a classical case of ornithophily?, 370
 Polyembryony, 213
Polygonum hydropiper, viability of seeds in, 268
Polyporus hispidus, on ash, 506
Polystigma rubrum, temperatures of leaves affected by, 388
 Poplar, *Fomes igniarius* on, 506
Portulaca oleracea, viability of seeds in, 268
 Potato, injury from freezing in storage, 555; ovules with two embryo sacs, 213
 Prairie inclusions in the deciduous forest climax, 330
 Preissia, 288
Puccinia Asparagi, susceptibility of onions to, 196; *Caryophylli*, artificial infection with, 188; *coronata*, 193; *coronifera*, 218, on oats, 190; *dispersa*, 187; *glumarum*, resistance to, in wheat, 186; *graminis* on barberry and wheat, 199; *graminis avenae* on oats, 197; *graminis tritici* on wheat seedlings, 188; *malvacearum* on *Althea rosea*, 195; *poculiformis*, 201; *rubigo-vera* on rye, 198; *secalina*, 218; *Sorghi*, 218, on *Zea Mays*, 190; *triticina*, 199, 218
 PULLING, HOWARD E. Biophysics as a point of view in plant physiology, 37
 Radish, respiration in, 277; roots, effect of increased nitrates upon growth of, 438
 RAINES, M. A. Vegetative vigor of the host as a factor influencing susceptibility and resistance to certain rust diseases of the higher plants I, 183; II, 215
 RANKIN, E. J. (See W. E. Tottingham, 270)
Reboulia Charrieri, 286; *hemisphaerica*, the male receptacle and antheridium of, 285; *occidentalis*, 286
 Reduction divisions in the pollen mother cells of *Oenothera franciscana*, the, 391
 Relations between root development and tillering in wheat, certain: significance in the production of high-protein wheat, 366
 Resistance and susceptibility to certain rust diseases of the higher plants, vegetative vigor of the host as a factor influencing, 183; 215
 Respiration, comparative studies on XXI.
 Acid formation and decreased production of CO₂ due to ethyl alcohol, 277; XXII. The effect of lactic acid on the respiration of wheat, 307
Rhamnus cathartica, 199
Rhizoctonia solani, 464
Rhizopus nigricans, 462; on strawberries, 204
 Ribes, resistance and susceptibility to infection by *Cronartium ribicola*, 197
Robinia Pseudo-Acacia, white heart-rot of, 493
 Root cells of *Salix nigra* Marsh., the relation of age to size in certain, 121
 Root growth in seed plants, studies of the mechanism of the physiological effects of certain mineral salts in altering the ratio of top growth to, 415
 Roots of corn, with plumule and endosperm removed but with cotyledon attached, effect of increased nitrates upon growth of, 439; radish, effect of increased nitrates upon growth of, 438
Rumex crispus, viability of seeds in, 268
 Rust diseases of the higher plants, vegetative vigor of the host as a factor influencing susceptibility and resistance to certain, 183; 215
 RUTH, W. A. The effect of Bordeaux mixture upon the chlorophyll content of the primordial leaves of the common bean, *Phaseolus vulgaris* L., 535
 Ruyschia, nectaries of, 371
Salix nigra Marsh., the relation of age to size in certain root cells and in vein-islets of the leaves of, 121
 Salts, the growth of field corn as affected by iron and aluminum, 47
Salvia, respiration in, 277
 SCHAFFNER, JOHN H., Control of the sexual state in *Arisaema triphyllum* and *Arisaema Dracontium*, 72
Schizophyllum commune, development of, 513
Sclerotinia cinerea, 464; *libertiana*, 464
 Scolopendrium in New York State, the present status of, 28; *vulgare*, 28
 Scrophulariaceae, stigmas of, 119
 Seed plants, studies of the mechanism of the physiological effects of certain mineral salts in altering the ratio of top growth to root growth in, 415

- Seed-viability experiment, Dr. W. J. Beal's, 266
Selaginella Kraussiana, 77
Septoria Apii, on celery plants, 233
Sesbania aculeata, floating roots of, 123
Sexual state, in *Arisaema triphyllum* and *Arisaema Dracontium*, control of the, 72
SMITH, EDITH PHILIP. Comparative studies on respiration XXII. The effect of lactic acid on the respiration of wheat, 307
Solanum tuberosum, polyembryony in, 213
Souroubea, 372
Sphaeropsis malorum, 464
Spirogyra, a new species of, with unusual arrangement of the chromatophores, 283; cell wall of, 18; *crassa*, 283; *rectispira*, description of, 284
SPONSLER, O. L. The structure of the starch grain, 471
Starch grain, the structure of the, 471
Sterigmatocystis violae, 464
STEVENS, NEIL E. Rots of early strawberries in Florida and southern California, 204; environmental temperatures of fungi in nature, 385
Stigmas, significance of the behavior of sensitive, 99
Strawberries, rots of early, in Florida and southern California, 204; temperatures of, 387
Strongylocentrotus purpuratus, 282
Susceptibility and resistance to certain rust diseases of the higher plants, vegetative vigor of the host as a factor influencing, 183; 215
Synthetic culture media, growth of some parasitic fungi in, 459
Syringa, rot of, 501
Tecoma radicans, stigma of, 100
TELLEFSEN, MARJORIE A. The relation of age to size in certain root cells and in vein-islets of the leaves of *Salix nigra* Marsh., 121
Temperature, low-, storage and freezing on fruits and vegetables, the effect of, 551; relations to disease virulence, 192
Torenia fournieri, stigma of, 100
TOTTINGHAM, W. E., and E. J. RANKIN. Nutrient solutions for wheat, 270
Trametes robiniophila, a study of the white heart-rot of locust caused by, 493
Transpiration, the effect of, on the absorption of salts by plants, 311
Trauma in relation to susceptibility to disease, 195
TRELEASE, SAM F., Incipient drying and wilting as indicated by movements of coconut pinnae, 253
Trifolium repens, viability of seeds in, 268
Triticum, species of, 199
Tubaria furfuracea, development of, 513
TURNER, THOMAS WYATT. Studies of the mechanism of the physiological effects of certain mineral salts in altering the ratio of top growth to root growth in seed plants, 415
Undercooling of peach buds, 93
UPHOF, J. C. TH. Ecological relations of plants in southeastern Missouri, I
Uromyces caryophyllinus, 238
Utricularia vulgaris, stigma of, 100
Variation, regressive, or reversion from the primary and secondary sports of *Nephrolepis exaltata* var. *bostoniensis*, 140
Vaucheria, healing in, 19
Vein-islets of the leaves of *Salix nigra* Marsh., the relation of age to size in, 121
Verbascum thapsus, viability of seeds in, 268
Vermicularia sp., 464
Viability of seeds, 266
Vitis vulpina, vein-islets in the leaves of, 121
Water relations to disease virulence, 191
WEINSTEIN, MARGARET. (See Marian Irwin, 277)
Wheat, certain relations between root development and tillering in: significance in the production of high-protein wheat, 366; nutrient solutions for, 270; respiration of, 307; scab, hydrogen-ion concentration in its relation to, 159; seedlings in nutrient solutions, 180
WILSON, CARL L. Lignification of mature phloem in herbaceous types, 239
YOUNG, H. C., and C. W. BENNETT. Growth of some parasitic fungi in synthetic culture media, 459
YOUNG, W. J. Potato ovules with two embryo sacs, 213
YUNCKER, T. G. Revision of the South American species of *Cuscuta* I, 557
Zea Mays, growth of, 47-71; *Puccinia Sorghi* on, 190, 219; roots of, 123
